The Cove Lakeside Resort

Architect : Coast Architectural Group

Engineer : Elbury Dolan Consulting Ltd.

Westbank BC

Lakeside resort that was designed from historic references and includes extensive use of wood and stone.

COMPLETE HEAVY TIMBER PACKAGES

GLULAM + PARALLAM + SOLID SAWN

INNOVATIVE WOOD SPECIALISTS

- 01** 3D modelling linked to 5-axis robotic technology eliminates errors and assures a high quality product.
- 02** Premium fibre from sustainably managed forests offers a beautiful renewable building material.
- 03** Melamine glue creates aesthetically superior beams with virtually invisible lamination lines.
- 04** Choice of finish provides the look you want, from classic smooth to a rustic finish that resembles solid timber.
- 05** Complete heavy timber packages are designed and fabricated for a perfect fit and rapid assembly.
- 06** Technical support from start to finish helps you bring your design to reality.

Tucked away in its own private niche on Okanagan Lake, The Cove Lakeside Resort is aptly named. This premier resort hotel features top grade exteriors inspired by a Westcoast craftsman style. Clean, contemporary, its lines showcase the natural beauty of its setting with a perfect balance of multi-stained glulam and stone. The private patio of the Grand Reserve Room was manufactured to replicate the natural look of heavy timber and stained dark brown while the entrance to the resort was stained in lighter, softer tones to perfectly blend with the Okanagan landscape.

Our company + our technology

For over 45 years, Structurlam Products Ltd. has been a premier supplier of heavy timber packages. Working closely with architects, designers, engineers, and contractors, Structurlam provides precision shop drawings using leading edge 3D CAD software specifically produced for the timber industry. These drawings are directly linked to our European CNC machines and North America's only 5 axis Creno. Wood members are precut and combined with steel connectors for a complete package that is not only aesthetically stunning, but cost effective. No job is too complex – Structurlam will fabricate whatever you envision.
