Kelowna BC *Clubhouse featuring the perfect combination of wood, light and views in the sun drenched Okanagan.*

# COMPLETE HEAVY TIMBER PACKAGES

GLULAM + PARALLAM + SOLID SAWN

INNOVATIVE WOOD SPECIALISTS

- 01** 3D modelling linked to 5-axis robotic technology eliminates errors and assures a high quality product.
- 02** Premium fibre from sustainably managed forests offers a beautiful renewable building material.
- 03** Melamine glue creates aesthetically superior beams with virtually invisible lamination lines.
- 04** Choice of finish provides the look you want, from classic smooth to a rustic finish that resembles solid timber.
- 05** Complete heavy timber packages are designed and fabricated for a perfect fit and rapid assembly.
- 06** Technical support from start to finish helps you bring your design to reality.

The Tower Ranch Club House crests an exquisite panorama of mountains in the sun drenched Okanagan. Wirebrushed Douglas-fir glulam trusses and beams add authenticity to the 10,000 square foot structure. Inside trusses, arching above an expanse of natural stone tile, are seamlessly connected with steel. Majestic, welcoming, the Tower Ranch Club House is a perfect example of design articulating an incomparable natural setting.

## Our company + our technology

For over 45 years, Structurlam Products Ltd. has been a premier supplier of heavy timber packages. Working closely with architects, designers, engineers, and contractors, Structurlam provides precision shop drawings using leading edge 3D CAD software specifically produced for the timber industry. These drawings are directly linked to our European CNC machines and North America's only 5 axis Creno. Wood members are precut and combined with steel connectors for a complete package that is not only aesthetically stunning, but cost effective. No job is too complex – Structurlam will fabricate whatever you envision.
