QUALITY CONTROL MANAGER

STATUS: Full Time Permanent Position

LOCATION: Penticton / Okanagan Falls / Oliver, B.C.

REPORTS TO: VP of Operations

THE ROLE: Under minimal supervision, performs all duties required to comply with Quality Control Procedures at Penticton, Oliver and Okanagan Falls Plants. Perform spot checks on incoming and outgoing supplies and products and document all non-conformances during operation. Also responsible for Quality Manual and satisfying audit requirements from third party auditors.

Position starting Monday Feb. 25th, 2019.

RESPONSIBILITIES:

- Manage and evaluate all Quality Control testing procedures performed at each plant
- Ensure testing is performed immediately to provide immediate feedback to management or stop production if necessary
- Manage and supervise QC technicians including vacation time
- Ensure QC personnel are performing efficiently and effectively
- Provide performance reviews to QC personnel
- Liaise with certifying agencies:
 - APA for Glulam and CLT
 - Weyerhaeuser for Parallam laminating
 - Internal management for non-certified products
- Ensure required production documents are filled out by each station
- Edit and improve the Structurlam Quality Manual
- Write non-conformance / deficiency reports and designs new procedure when required for plant managers to approve
- Create custom checking protocol on unique jobs that require higher standards of accuracy than normal

- Train with other industry partners to ensure Quality practices are current
- Train employees to fill out quality reports as required
- Perform spot checks on visual grading, framing accuracy, steel connection specs, etc.
- Perform internal audits at all plants to ensure quality manual and production are congruent
- Required to shut down manufacturing or finishing plant if there is a danger of products being made that do not satisfy standards
- Meet with tour groups and customers, and perform site inspections when required

QUALIFICATIONS:

- Experience Managing a Quality control department
- Experience Managing people
- Work independently with minimal supervision
- Ability to prioritize and multi-task for maximum efficiency without sacrificing accuracy
- Excellent written and verbal communication skills
- Professional and pleasant manner to co-workers and visitors
- Ability to read and understand shop drawings and drafting documents
- Proficiency in use of computers and MS Office software (Excel, Word, Outlook...)
- Excellent organizational and time management skills
- Detail-oriented work ethic
- Post-secondary degree or diploma
- Mechanical, engineering and programming experience is an asset
- Wood Science background is valuable
