## **FACT SHEET**

### **About Structurlam Mass Timber Corporation**

[Structurlam Mass Timber Corporation](#) is the leading North American provider of innovative and cost-effective glued laminated mass timber solutions for the construction and industrial markets in Canada and the United States. The company's world-class reputation is the outcome of nearly 60 years of innovation and quality, resulting in more award-winning structures than any other manufacturer in North America. Offering products such as CrossLam® cross-laminated timber (CLT) panels and GlulamPLUS® columns and beams, Structurlam's mass timber solutions cover the spectrum – from simple beams and panels to the most complex and beautiful mass timber structures in the world. In industrial markets, the company's CrossLam® CLT ground protection matting products have provided safe and easy access to work sites.

At the core of Structurlam's value-added production are its people and state-of-the art mass timber production technology. Using mass timber for both its engineered strength and architectural beauty, Structurlam works closely with its customers to create complete solutions delivered on time.

Structurlam is at the forefront of the mass timber revolution. It took root in British Columbia, realizing early on that the future is not a place we are going, but one we are creating. Structurlam established its goal to bring about a dramatic transformation in building construction by combining a passion for wood science with timber engineering expertise.
